**Subject:** RE: EPA issues Notices of Violation to Greif/CLCM/Mid-America

Hi all,

A few questions on where things stand with the response to Greif / Mid-America:

1. Can you provide any update following the November announcement?
2. We understand EPA is working with the community surrounding one site to gather air quality data. Is EPA working with the communities near the other two sites?
3. Is EPA taking any action under the Community Right to Know Act?
4. Is EPA doing anything else to share updates with local communities near the sites to share information on past exposures as well as incidents of exposure that may occur in the future?

Thanks in advance!

Colleene (direct: 202-224-4028)

**Subject:** EPA issues Notices of Violation to Greif/CLCM/Mid-America

Colleene/Mike – sorry for not responding yesterday, but we knew this was imminent. Please let me know if you have follow-up questions.

The U.S. Environmental Protection Agency has issued Notices of Violation to Greif, Inc. (Greif), and Container Life Cycle Management, LLC (CLCM), doing business as Mid-America Steel Drum, for alleged violations of the Resource Conservation and Recovery Act and Clean Air Act, based on inspections and sampling at three facilities in Wisconsin.

EPA alleges that at facilities in Milwaukee, St. Francis, and Oak Creek, Greif and CLCM violated RCRA regulations regarding the storage and transportation of hazardous waste, as well as recordkeeping and reporting requirements. EPA also alleges the companies unlawfully treated hazardous waste in an incinerator at the Oak Creek facility when burning material that exited from drums.

EPA alleges violations of the CAA at the St. Francis and Oak Creek facilities. At the St. Francis facility, the companies allegedly failed to control volatile organic compounds and hazardous air pollutant emissions, obtain proper permits, meet work practice standards and recordkeeping requirements, and adequately respond to EPA's request for information. At Oak Creek, EPA alleges that CLCM and Greif failed to comply with requirements associated with the combustion of hazardous waste, including demonstrating compliance with emission limits, performance testing, monitoring, notifications, recordkeeping and reporting.

EPA, in coordination, with the Wisconsin Department of Natural Resources and other governmental agencies, continues to investigate and intends to take appropriate action. EPA is committed to communicating publicly available information regarding its efforts and has established a webpage, which will be updated with related information. The companies have 30 days to respond to EPA regarding the allegations in these NOV's. These violations of RCRA and CAA that EPA has alleged are in addition to the allegations in the NOV's WDNR sent to the companies earlier this year.
